

# DRAFT Fire Hazard Severity Zones in LRA

**Fire Hazard Severity Zones**

 LRA Very High	 Other Very High
 LRA High	 Other High
 LRA Moderate	 Other Moderate
 LRA Unzoned	 Other Unzoned

--- City Boundary  
--- Parcels  
--- County Boundary

Government Code 51175-89 direct the California Department of Forestry and Fire Protection (CAL FIRE) to map areas of very high fire hazard within Local Responsibility Areas (LRA). Mapping of the areas, referred to as Very High Fire Hazard Severity Zones (VHFHSZ), is based on relevant factors such as fuels, terrain, and weather. VHFHSZ maps were initially developed in the mid-1980s but are now being updated based on improved aerials, mapping techniques, and data.

The California Building Commission adopted the Wildland-Urban Interface codes in late 2005 to be effective in 2008. These new codes include provisions to improve the ignition resistance of buildings, especially from firebrands. The updated fire hazard severity zones will be used by building officials to determine appropriate construction materials for new buildings in the Wildland-Urban Interface. The updated zones will also be used by property owners to comply with natural hazards disclosure requirements at time of property sale and 100 foot defensible space clearance. It is likely that the fire hazard severity zones will be used for updates to the safety element of general plans.

This map has been created by CAL FIRE's Fire and Resource Assessment Program (FRAP) using data and models describing development patterns, potential fuels over a 30-50 year time horizon, expected fire behavior, and expected burn probabilities to quantify the likelihood and nature of vegetation fire exposure (including firebrands) for new construction. Details on the project and specific modeling methodology can be found at <http://frap.cdf.ca.gov/projects/hazards/methods.htm>.

This version dated September 17, 2007 of the map shown here represents draft VHFHSZs within LRA, for review and comment by local government.

An interactive system for viewing map data is hosted by the UC Center for Fire at <http://firecenter.berkeley.edu/frap/>

Questions can be directed to:  
Kathleen Schott (Northern Region) (530) 472-3121 [kathleen.schott@fire.ca.gov](mailto:kathleen.schott@fire.ca.gov)  
Sara Barton (Southern Region) (959) 243-4130 [sara.barton@fire.ca.gov](mailto:sara.barton@fire.ca.gov)

This map was developed using data products such as parcel and city boundaries provided by local government agencies. In certain cases, this includes copyrighted geographic information. The maps are for display purposes only - questions and requests related to parcel or city boundary data should be directed to the appropriate local government entity.
